

The Hub Releases Lessons Learned from a Multi-Stakeholder Roundtable on Medicaid Maternity Strategies

Released February 21, 2023

Overview

The Health Care Transformation Task Force's [Maternal Health Hub](#), supported by the [Commonwealth Fund](#), convened a meeting of maternity subject matter experts and CMS/CMMI leadership in 2022 to discuss payment and delivery strategies that would support a maternity model that addresses the ongoing racial and ethnic inequities in morbidity and mortality.

The Hub is pleased to release the resulting issue brief titled "[Lessons Learned from a Multi-Stakeholder Roundtable on Medicaid Maternity Strategies](#)" This brief describes the key challenges in today's maternal care delivery environment such as access to high quality, respectful care; lack of access to comprehensive post-partum care (including behavioral health care); lack of prioritization of health equity in the maternity space; and inconsistent funding/support for community-based providers and care settings. The brief also includes potential solutions such as leveraging existing policy and funding opportunities, establishing Medicaid pay parity for midwives and birth centers, and developing payment reforms that support the community-based maternity model.

We encourage you to share this resource widely with your networks!
